Iridium Message Delivery Areas (MDAs) Table of Codes

Iridium World Page Service MDAs for land and territorial waters 22–23

Iridium Aeronautical Page Service

Iridium World Aero Message Delivery Areas for international air travel routes 24–29

Iridium World Page Service

Iridium World Page Service covers the Earth's entire surface and makes it possible for you to receive messages virtually anywhere, anytime. Available as a stand-alone service or as a complement to other Iridium services, Iridium World Page Service allows you to receive alphanumeric messages of up to 120 characters in any one of 16 languages. It is important to keep in mind that delivery of a satellite message will take several minutes.

Message Delivery Areas

The Iridium network directs messages to your pager according to specific geographic regions known as Message Delivery Areas (MDAs). To ensure that messages are delivered to the area(s) where you are located, it is important that you select up to three MDAs.

To select an MDA for your pager, refer to the MDA maps and complete the following steps:

Touch-tone registration

STEP 1: Using a touch-tone phone, call your Iridium pager number and wait for your mailbox greeting.

STEP 2: Enter * and your PIN.

STEP 3: Press 4 to access the personal options menu

STEP 4: Press 3 to modify your message notification options.

STEP 5: Press 2 to review or change your default delivery area

STEP 6: Press 2 to add a delivery area

Press 3 to delete a delivery area

NOTE: PRESS THE # KEY AFTER YOU ENTER AN MDA. IF YOU ALREADY HAVE THREE MDAs SELECTED, DELETE AN MDA BEFORE SELECTING A NEW ONE.

Operator-assisted registration

STEP 1: Call your service provider's customer service for assistance with establishing or changing MDA locations. Before calling, have your pager number and password available.

NOTE: THIS ASSISTANCE IS AVAILABLE AT THE DISCRETION OF YOUR SERVICE PROVIDER.

Warnings

Iridium service is contingent on national government approval. For current service availability, please refer to the Iridium coverage maps enclosed in the Welcome Kit. You may also view the latest maps on our Web site at www.iridium.com.

Your pager works best with a clear view of the sky, or near a window inside buildings. If you are inside a building, tunnel, or other structure that limits signal penetration, the satellite signal may be weak or unavailable. To check the signal strength indicator, press and hold the top button on the pager for two seconds.

Please see page 8 of the User Guide for more information.
