

PSN Marine-Auto Kit MA-1000

The PSN Marine-Auto kit offers Globalstar™ users a new compact and creative way to get maximum benefit from their GSP1600 satellite telephone.

The unit can be attached to brackets or to a fixed object on any side using the mounting holes on the top, sides or back of the rugged steel case.

The front panel contains all the electronics and can be removed and mounted into a console. Access holes are provided in the front and back for the antenna and power cables.

The small external antenna can be magnetically mounted on a car. For marine use there is an optional rail mount.

You can now use your Globalstar™ phone from the comfort of your car, your boat, your office or from a communications console.

The unit is available in several attractive colors.
